Dr. Brandon Borer receives an additional certification in rearfoot and ankle surgery

For Immediate Release

(COLUMBUS, Neb.) – Dr. Brandon Borer, doctor of podiatric medicine at Columbus Orthopedic & Sports Medicine Clinic, has gained an additional certification in rearfoot and ankle surgery from the American Board of Foot and Ankle Surgery (ABFAS).

ABFAS board certification is the highest standard in foot and ankle surgery. It signifies that surgeons have demonstrated to their peers and to the public that they have the clinical judgment, surgical skills and ability to provide excellent patient care.

"I am pleased to offer my added certification and expertise to the residents of Platte County and surrounding communities," Dr. Borer said.

Dr. Borer specializes in the surgical treatment of the foot and ankle, including trauma, reconstructive surgery and sports medicine.

"Dr. Borer's new rearfoot certification demonstrates his dedication to providing the most advanced treatments for all types of conditions of the foot and ankle. His efforts continue to ensure that patients in Columbus and the surrounding communities have access to high quality, comprehensive foot and ankle care," said Dr. Dustin Volkmer, medical director of orthopedics at Columbus Community Hospital and orthopedic surgeon with Columbus Orthopedic & Sports Medicine Clinic.

ABFAS strives to protect and improve the health and welfare of the public by advancing the art and science of foot and ankle surgery. To accomplish this goal, ABFAS grants certification status to candidates who have successfully met the guidelines for demonstrating competency and proficiency in the art and science of foot and ankle surgery.
