Columbus Plastic Surgery offers comprehensive services with natural results

For Immediate Release

(COLUMBUS, Neb.) – Patients looking to make a change to their appearance do not need to leave the state to find a top-notch plastic surgery clinic. Columbus Plastic Surgery is proud to offer Nebraska patients comprehensive services and natural results.

The clinic is dedicated to providing high-quality plastic surgery procedures for the face and body, skin rejuvenation and anti-aging techniques.

Dr. Sanjay Mukerji is board certified in plastic surgery and has been in practice for more than 20 years. Mukerji places an emphasis on treating each individual in a personal and unique way and tailors treatment plans to meet patients' specific needs.

"It's a two-way conversation in which patients let me know what their needs are, and I tell them how I can help them achieve those needs," Mukerji said. "Then, we decide how we can both move toward the same goal."

The clinic offers a full spectrum of surgical and non-invasive procedures such as breast augmentation, reconstruction and reduction, tummy tucks, liposuction, face-lifts, nose surgery, brow lifts, BOTOX, dermal fillers and much more.

"I believe in excellence," Mukerji said. "Unlike with general surgery, plastic surgery results are usually in plain sight, so it's imperative that I leave patients looking beautiful and natural. That motivates me to do my absolute best."

Columbus Plastic Surgery is in the Visiting Physicians Clinic in the Healthpark Medical Office Building at 4508 38th St., Suite 210.
