Free Foot Screenings: Put Your Best Foot Forward

For Immediate Release

(COLUMBUS, Neb.) – Each day, our feet and ankles bear the burden of supporting our full body weight. The incredible demand we put on them is often more than they can endure. But, Dr. Brandon Borer, the podiatric specialist at Columbus Orthopedic & Sports Medicine Clinic, knows that even if you are suffering pain or discomfort in your feet or ankles, you don't need to live with it.

With that in mind, Dr. Borer is offering free foot screenings from 4 to 7 p.m., Wednesday, March 4, and Wednesday, April 1, at the Columbus Orthopedic & Sports Medicine Clinic, 4508 38th St., Suite 133.

Schedule an appointment to receive a complimentary foot examination with Dr. Borer. He can screen for the following foot issues:

- Bunions
- Hammertoes
- Ingrown toenails
- Corns and callouses
- Neuromas
- Plantar fasciitis
- Heel and arch pain
- Fractures of the foot and ankle
- Flat feet

The event is open to the public with all ages welcome. It's a great opportunity to ask questions, discuss foot and ankle issues and receive recommendations for future treatment from a board-certified podiatrist.

To schedule an appointment, call 402-562-4700. For more information about Columbus Orthopedic & Sports Medicine Clinic, visit www.columbushosp.org.
