**Learn How to Reduce Worker Compensation Claims
with the Physical Capacity Profile® testing system**

For Immediate Release

(COLUMBUS, Neb.) – Columbus Community Hospital's Occupational Health Services is hosting a free Lunch & Learn event Wednesday, Aug. 25, from noon-1 p.m. in the Pawnee and Pioneer rooms of CCH's first-floor conference center. During the event, staff will demonstrate the patented Physical Capacity Profile testing system.

This system helps companies determine employees' physical capabilities and limitations before they start working. It provides quantitative data that assists in the placement process while meeting all regulatory compliance criteria. The testing system has resulted in fewer workplace injuries, lower insurance costs and increased productivity for companies.

Attendees can enjoy a complimentary lunch at 11:45 a.m.; they must preregister for the event by Monday, Aug. 23. For more information, contact Ileana Jarecki at 402-562-4490 or imjarecki@columbushosp.org.
