

Why choose W.O.C. Health Center?

Being Healthy and active are two of life's greatest pleasures. For people that have chronic wound, ostomy, and/or continence issues, life can lose its enjoyment.

The W.O.C. Health Center at Columbus Community Hospital understands these concerns, and offers effective treatments that can help with these conditions. Evidence-based practices with the most advanced treatment options help our patients improve these conditions so they can feel better and get back to enjoying life.

When to Refer:

WOUNDS: Patients that have chronic non-healing wounds including Pressure Ulcers, Neuropathic Ulcers, Venous Leg Ulcers, and Arterial Ulcers.

Medically compromised patients with wounds.

OSTOMY: Patients that are having problems with inadequate wear time of wafers or peri-stomal skin/wound complications.

CONTINENCE: Patients that are interested in incontinence treatment options.

Wound, Ostomy & Continence

REFERRING YOUR PATIENTS

Our Professionals

Our team consists of specially trained Doctors, Certified Wound Ostomy and Continence Nurses, Registered Nurses, and other medical professionals that work together to help guide our patients through the continuum of care.

Constant Communication

We provide a thorough diagnostic appraisal of the patient, followed by a carefully designed treatment plan. The plans are fully documented and communicated through updates sent to your office following clinic visits. We keep you informed and involved in the treatment and recovery process of your patient.

Our Mission is to Improve the Health of the Communities We Serve.
